

Upgrade FreeBSD 8.1 to 9.0 stable release

Written by BiRU
Monday, 18 August 2014 11:39 -

```
# freebsd-update upgrade -r 9.0-RELEASE  
# freebsd-update fetch  
# freebsd-update install  
# reboot
```

The system will reboot with the new kernel after the reboot, run `freebsd-update install` again to install userland components and rebot

```
# freebsd-update install  
# reboot
```

You also need to update all packages, type:

```
# portsnap fetch update  
# pkg_version -vIL=  
# portupgrade -a
```
