---

```
# freebsd-update upgrade -r 9.0-RELEASE
# freebsd-update fetch
# freebsd-update install
# reboot
```

The system will reboot with the new kernel after the reboot, run `freebsd-update install` again to install userland components and rebot

```
# freebsd-update install
# reboot
```

You also need to update all packages, type:

```
# portsnap fetch update
# pkg_version -vIL=
# portupgrade -a
```
