Nih buat member yang pake modem SMARTFREN tapi koneksinya ga stabil n lemot abis ane nemu settingan apn nya biar lebih kenceng...:senang:senang

kan kalo settingan APN default kayak gini nih :

Quote:Default :
Number : #777
username : smart
pass : smart

nah kalo makin banyak yang pake settingan default kaya diatas ntar makin lemot koneksinya...:suram

nah ini ada settingan alternatifnya biar koneksi makin maknyus n makin ngebut..eit tapi sebelum ntu pake helm dulu ntar takut ditilang pak polisi kalo ngebut ngebut...ngakak

nih settingan APN biar ngebut but but kaya ROSSI :

Quote:Number : *98#
username : wap
pass : wap

username: wap, password: wap, dial-number : *31*11111#
username: cdma, password: cdma, dial-number : *31*11111#
username: smart,password: smart,dial-number : *31*11111#
username: wap, password: wap, dial-number : #777
username: cdma, password: cdma, dial-number : #777
username: smart,password: smart,dial-number : #777
