

Upgrade FreeBSD 8.1 to 9.0 stable release

Written by BiRU

Monday, 18 August 2014 11:39 -

```
# freebsd-update upgrade -r 9.0-RELEASE
# freebsd-update fetch
# freebsd-update install
# reboot
```

The system will reboot with the new kernel after the reboot, run freebsd-update install again to install userland components and rebbot

```
# freebsd-update install
# reboot
```

You also need to update all packages, type:

```
# portsnap fetch update
# pkg_version -vL=
# portupgrade -a
```
