## Upgrade FreeBSD 8.1 to 9.0 stable release

Written by BiRU Monday, 18 August 2014 11:39 -

```
# freebsd-update upgrade -r 9.0-RELEASE
# freebsd-update fetch
# freebsd-update install
# reboot
```

The system will reboot with the new kernel after the reboot, run freebsd-update install again to install userland components and rebbot

# freebsd-update install # reboot

You also need to update all packages, type:

# portsnap fetch update # pkg\_version -vIL= # portupgrade -a
